LIST OF CONTENTS

Number 1

M. C. Barreto, P. Ciambelli, G. Del Re and A. Peluso	1	A theoretical study of ion selectivity of zeolites—application to chabazite
M. M. Vergara and E. L. Varetti	13	Thermal behavior and vibrational spectra of cesium nitroprusside monohydrate, $Cs_2[Fe(CN)_5NO].H_2O$
D. A. Cleary, E. M. Hamizar and A. H. Francis	21	Spectroscopic and ESR studies of $Cd_2P_2S_6$ intercalated with pyridine complexes of ferric ion
E. Di Mauro and W. Sano	29	EPR of Mn^{2+} doped in $Zn(BF_4)_26H_2O$
C. Ko and R. B. McLellan	33	The thermodynamics of Fe–Pt–N austenites
J.-P. Doumerc, A. Ammar, A. Wichainchai, M. Pouchard et P. Hagenmuller	37	Sur quelques nouveaux composés de structure de type delafossite
R. W. Grimes, A. B. Anderson and A. H. Heuer	45	Interaction of dopant cations with 4:1 defect clusters in non-stoichiometric 3*d* transition metal monoxides: a theoretical study
R. Ramírez, R. Nesper, H. G. von Schnering and M. C. Böhm	51	On the validity of formal electron counting rules in lithium silicides
G. Lucazeau, J. R. Gavarri and A. J. Dianoux	57	Study of Na^+ motions in βAl_2O_3 by quasi-elastic neutron scattering
A. Zięba, R. Zach, H. Fjellvåg and A. Kjekshus	79	Effect of external pressure and chemical substitution on the phase transitions in MnAs
N. J. Walker, G. A. Saunders and N. Schül	91	Acoustic mode vibrational anharmonicity of PbSe and other IV–VI compounds

Number 2

T. A. Hewston and B. L. Chamberland	97	**Review Article Number 8. A survey of first-row ternary oxides $LiMO_2$ (M = Sc–Cu)**
Colin L. Honeybourne	109	**Review Article Number 9. Solid thin films of extended π-systems: deposition, characterisation and application**
Shigeru Yamamoto, Ichiro Ohno and Orson L. Anderson	143	High temperature elasticity of sodium chloride
K. Hashizume	153	Energy bands of solid argon
Yukio Ito, Katsuki Miyauchi and Tetsuichi Kudo	161	Characterization of polymer electrolyte films prepared from poly(ethylene oxide) with $LiCF_3SO_3$ by the evaporation method
A. Svane and E. Antoncik	171	Electronic structure of rutile SnO_2, GeO_2 and TeO_2

T. Warminski and Y. Ito 181 X-ray analytical studies of the bismuth germanate crystals

V. P. Zhukov and V. A. Gubanov 187 The study of the energy band structures of TiC, VC, Ti_4C_3 and V_4C_3 by the LMTO–ASA method

James R. Chelikowsky and Karen E. Anderson 197 Melting point trends in intermetallic alloys

Number 3

C. Parent, C. Lurin, F. Guillen, G. Le Flem, P. Hagenmuller and M. Couzi 207 Investigation of spatial distribution of neodymium in phosphate glasses by Raman and kinetic luminescence spectroscopy

A. Ramdani, J. Steinmetz, C. Gleitzer, J. M. D. Coey and J. M. Friedt 217 Perturbation de l'échange électronique rapide par les lacunes cationiques dans $Fe_{3-x}O_4 (x \leqslant 0{,}09)$

M.-D. Guo, A. T. Aldred and S.-K. Chan 229 Magnetic susceptibility and crystal field effects of rare-earth orthovanadate compounds

S. Kiger, A. Compaan and J. S. Eck 237 Rutherford backscattering studies of surface density reduction in ion-implanted and excimer-laser-annealed Ge

Fu Wen Tian, C. Fouassier and P. Hagenmuller 245 Influence of energy migration on the luminescence of $Li_6Eu(BO_3)_3$, a material with predominant one-dimensional interactions

A. Watterich, R. H. Bartram, G. J. Edwards, O. R. Gilliam, I. Földvári and R. Voszka 249 Electron spin resonance of Cr^{5+} in TeO_2:Cr

K. Sumiyama, H. Ezawa and Y. Nakamura 255 Magnetic properties of metastable BCC and amorphous $Fe_{1-x}Mo_x$ alloys produced by vapor quenching

M. Md. Ibrahim, V. Ramachandran and K. Sarangapani 263 Mode Gruneisen parameters and thermal expansion of sodium nitrate

L. Gastaldi, M. G. Simeone, S. Viticoli, A. Tomas, M. Guittard and M. Winterberger 269 Two-dimensional magnetic behaviour of $Cr_xGa_{2.67-x}S_4$ ($0.87 \leqslant x \leqslant 1.00$) layered compounds

S. Swanepoel and C. M. Stander 275 Mössbauer spectroscopic study of iron fluoride surface layers

H. J. Van Rijn, H. L. Alberts and J. A. J. Lourens 283 Elastic constants and thermal expansion of dilute Cr–Ge alloys

B. Atoussi, H. Chermette and C. Pedrini 289 Electronic structure of $(Ag^+)_2$ pairs in NaCl: a theoretical approach

Technical Note

H. C. Gupta, G. S. Reddy and B. B. Tripathi 297 Phonon density of states of amorphous Si_xC_{1-x}

Number 4

D. E. Cox, A. C. Damask and G. J. Dienes 299 Editorial

V. L. Ginzberg 301 Obituary: Evgenii Mikhailvoich Lifshitz

Charles J. O'Connor and Joseph F. Noonan 303 Photo-induced magnetic bubbles in the spin glass alloy Fe_2SnTe_4

Miguel Lagos and **Miguel Kiwi** 309 Mixed valence as a polaronic effect

Christian M. Braun and **Akira Fujishima** 315 Kinetics of photoelectret states in germanium-sillenite

R. F. Brebrick and **Yi Gao Sha** 323 Some general properties of the liquidus surface of a "pseudo-binary" solid solution $(A_{1-w}B_w)_{1-\delta}C_{1+\delta}$

Jun Shen, Charles W. Myles and **Jeffrey R. Gregg** 329 Coherent potential approximation calculations for electronic spectra of one-dimensional quaternary alloys

M. Susaki and **N. Yamamoto** 341 Room temperature photoconductivity of $CuGaSe_2$

Gary R. Burns and **Joanne R. Rollo** 347 The use of Raman spectroscopy as a probe for the intermolecular bonding in crystalline tetraphosphorus trisulphide

R. J. Thorn 355 A model for electrical conductivity in $(TMTSF)_2ClO_4$, $(TMTSF)_2ReO_4$ and related materials

Y. Vaills and **J. Y. Buzaré** 363 EPR studies of Gd^{3+} centres in the cubic phase of $CsCaCl_3$ and $CsPbCl_3$

D. F. Mariani, F. Brito, C. Oyarzun and **J. Vignolo** 371 Thermoluminescence in plastically deformed and irradiated KBr single crystals

L. Er-Rakho, C. Michel, F. Studer and **B. Raveau** 377 The oxygen-deficient perovskite $Ba_{0.5}La_{0.5}Fe_{1-x}Cu_xO_{2.75-x/2+\delta}$ —a *p*-type semi-conductor with high Cu(III) and Fe(IV) contents

Hui Jun Won, Sung Ho Park, Keu Hong Kim and **Jae Shi Choi** 383 Electrical conductivity of the system ZrO_2–Er_2O_3

J. I. Kaplan 391 Solid state NMR free induction decay in the presence of vacancy diffusion

Number 5

Hang-sheng Wu, Zheng-yu Weng, Guangda Ji and **Zi-fang Zhou** 395 **Review Article Number 10. Analytic solution to the Eliashberg equation for the superconducting critical temperatures**

Z. A. Matysina, A. O. Mekhrabov, Z. M. Babaev and **S. Yu. Zaginaichenko** 419 Impurities in Ni_3Fe magnetic alloys

Qi-guang Luo and **Rong-yao Wang** 425 Electronegativity and superconductivity

F. A. Benko and **F. P. Koffyberg** 431 Opto–electronic properties of *p*- and *n*-type delafossite, $CuFeO_2$

K. J. Smolander 435 Electrical properties of $BaTiO_3$ with a new parameterization for repulsion effects

D. Chippaux, B. Mercey and **A. Deschanvres** 447 Relation entre propriétés électriques et defauts de reseau dans $ZnSiAs_2$—I. Analyse de l'énergie d'ionisation

D. Chippaux, B. Mercey and **A. Deschanvres** 459 Relation entre propriétés électriques et defauts de reseau dans $ZnSiAs_2$—II. Analyse de la mobilité

N. Abolhassani and **F. J. Bryant** 469 Effect of non-stoichiometry on the occurrence of Er^{3+} luminescence sites in erbium-implanted zinc selenide

M. W. Urban and B. C. Cornilsen 475 Bonding anomalies in the rare earth sesquioxides

J. R. Anderson, W. B. Johnson, D. R. Stone and J. K. Furdyna 481 Large negative magnetoresistance of $Cd_{0.9}Mn_{0.1}Se$

D. E. Tsatis 489 Thermal expansion of pyrrhotite (Fe_7S_8)

K. P. Maheshwari and G. Tarey 491 Stimulated Raman scattering of an extraordinary mode in a solid state plasma

Number 6

C. DeW. Van Siclen 497 Transverse Zeeman effect for ions in uniaxial crystals with and without mirror plane symmetry

M. E. Hills, D. C. Harris and C. K. Lowe-Ma 501 Zinc aluminum sulfide: electron paramagnetic resonance spectroscopy and infrared transmittance

A. K. Pradhan, R. N. P. Choudhary and B. M. Wanklyn 509 Infrared reflection and optical absorption studies on $SmAsO_4$

O. E. Taurian and A. H. Tang Kai 513 Calculation of optical absorption energies and hyperfine interactions of F centres in alkaline-earth fluorides

P. Adler, L. Wiehl, E. Meißner, C. P. Köhler, H. Spiering and P. Gütlich 517 The influence of the lattice on the spin transition in solids. Investigations of the high spin $\rightleftharpoons$ low spin transition in mixed crystals of $[Fe_xM_{1-x}(2\text{-pic})_3]Cl_2 \cdot MeOH$

Wang Zhi-Chang 527 Thermodynamics of nonstoichiometric multicomponent uranium oxides

H. Indrawirawan, L. J. H. Brasche, C. V. Owen, D. K. Rehbein, O. N. Carlson, D. T. Peterson and O. Buck 535 Internal friction studies of the effect of hydrogen on the oxygen Snoek peaks in V and Nb

J. Guth and W. T. Petuskey 541 Structural aspects of bonding in silicon carbide polytypes: *ab initio* MO calculations

T. J. Zhang 551 Experimental study of electrical properties at the Nd-doped Si–SiO_2 interface

T. Behner and G. Lehmann 555 EPR of Fe^{3+} in CsCl and NH_4Cl

W. K. Wang and H. Iwasaki 559 Isothermal compression of the $L1_0$-type alloy CuAu

R. Gerhardt, W.-K. Lee and A. S. Nowick 563 Anelastic and dielectric relaxation of scandia-doped ceria

S. U. Jen, Y. D. Yao and S. Arajs 571 Temperature dependence of the electrical resistivity and deviations from Matthiessen's rule of Pd–Er alloys

C. Ko and R. B. McLellan 575 The thermodynamics of nitrogen austenites containing noble-metal substitutional solutes

S. A. Akbar, M. Kaburagi and H. Sato 579 Soret effect in solid—II

R. D. Jones and K. Rose 587 Thermal stability of InN

Technical Note

G. Blasse and G. J. Dirksen 591 Luminescence of high-temperature zirconium molybdate

Number 7

Y. Feng and **H. N. Spector** 593 Scattering of excitons by free carriers in semiconducting quantum well structures

R. B. McLellan and **T. Ishikawa** 603 The elastic properties of aluminum at high temperatures

J. M. Newsam, Y. Endoh and **I. Kawada** 607 Measurement of the cation partitionings in $Fe_xV_{3-x}S_4$ ($x = 1.0$ and 2.0) by powder neutron diffraction

A. Szökefalvi-Nagy, S. Filipek and **R. Kirchheim** 613 Pressure-composition isotherms of hydrogen in amorphous $Pd_{(1-x)}Si_x$

M. Menon and **C. W. Myles** 621 Substrate response to atomic scattering from solid surfaces

A. Taitai and **J. L. Lacout** 629 Hydroxylation and fluorination of europium containing oxyapatites

J. Przyłuski, M. Zagórska, A. Proń, Z. Kucharski and **J. Suwalski** 635 Synthesis and characterization of conducting polypyrrole-containing iron complexes

G. A. Slack, R. A. Tanzilli, R. O. Pohl and **J. W. Vandersande** 641 The intrinsic thermal conductivity of AlN

K. M. E. Miedzinska, B. R. Hollebone and **J. G. Cook** 649 An assignment of the optical absorption spectrum of mixed valence Co_3O_4 spinel films

S. A. Akbar and **I. Z. Kostadinov** 657 Hopping conduction in Na-β-alumina

R. B. McLellan and **M. Yoshihara** 661 The diffusion of hydrogen in b.c.c. V–Ti solid solutions

W. Jeitschko and **M. Reehuis** 667 Magnetic properties of $CaNi_2P_2$ and the corresponding lanthanoid nickel phosphides with $ThCr_2Si_2$ type structure

G. Corradi, R. H. Bartram, A. R. Rossi and **J. Janszky** 675 A molecular cluster model of the $V_O^{\cdot}$ center in paratellurite

Technical Note

V. Sivakumar, B. Sukumar and **K. Navaneethakrishnan** 683 Comment on the piezopolaron bound states in semiconductors

Number 8

R. G. Mani, J. R. Anderson and **W. B. Johnson** 687 Phase differences between quantum oscillations of the magnetoresistance and the Hall effect in $Hg_{1-x}Mn_xTe$ and $Hg_{1-x}Cd_xTe$

Jinghong Shi and **H. B. Huntington** 693 Electromigration of gold and silver in single crystal tin

Xia Yueyuan, Tan Chunyu, Zheng Zongshuang, Zhang Qichu, Zhu Peiran, Liu Jiarui, Yang Hong, Hu Xierong and **Chen Lixin** 697 Depth profiles of fluorine in $^{19}F^+$ ion-implanted $Pb_{1-x}Sn_xTe$ and CdTe

Ikuzo Kanazawa, Shoichiro Tanigawa, Ryoichi Suzuki, Yoji Mizuhara, Mizuka Sano and **Hiroo Inokuchi** 701 Two-dimensional electron momentum distribution in graphite revealed by means of angular correlation of positron annihilation

M. H. Tuilier, H. Dexpert, P. Lagarde, M. Devalette and **N. Khachani** 707 An EXAFS study of the local distortions in some $Bi_{12}[A_\alpha^{x+}B_\beta^{y+}]O_{20}$ oxides with sillenite-type structure

J. E. Lowther and A. Andriotis 713 Directionality of the metallic bonding in titanium carbide

Lin-gun Liu 719 Polymorphism and compression of TeO_2 at high pressure

A. Tawansi, Morsi M. Morsi, S. El-Konsol and M. El-Hofy 723 Electrical conductivity of gamma-irradiated Ti silicate glasses

Zhou Yi-Yang and Zhao Min-Guang 729 Study of the structure of $FeSiF_6 \cdot 6H_2O$ by EPR and optical spectra

Chul Hyun Yo, Sung Ho Park, Jae Shi Choi and Moo Sil Pyon 733 A study of nonstoichiometry and the electrical conductivity of erbium sesquioxide

A. Erçelebi and G. Süalp 739 A variational treatment of a two-dimensional polaron

Vijay Baboo Gupta and H. C. Gupta 743 Phonon dispersion relations of the A15 compound Nb_3Sb

A. K. Wong, R. Jones and J. G. Sparrow 749 Thermoelastic constant or thermoelastic parameter?

A. Jayaraman, G. A. Kourouklis, G. P. Espinosa, A. S. Cooper and L. G. Van Uitert 755 A high-pressure Raman study of yttrium vanadate (YVO_4) and the pressure-induced transition from the zircon-type to the scheelite-type structure

F. Faudot, J.-C. Rouchaud, L. Debove, M. Fedoroff and J. Bigot 761 Elaboration of high purity iron (RRR > 4000) by horizontal zone melting—attempts for chemical characterization

G. Petot-Ervas, C. Petot and F. Gesmundo 767 Transport properties of *p*-type semiconducting oxides—influence of aliovalent impurities

Book Review

D. Groves, K. Zwilsky, S. Barkin and G. Economos 777 Encyclopedia of Materials Science and Engineering

Number 9

T. Ido, A. Heurtel, R. Triboulet and Y. Marfaing 781 Deep level structure and compensation mechanism in In-doped CdTe crystals

G. Collin, M. F. Gardette and R. Comes 791 The $Fe_{1-x}Co_xS$ system ($x < 0.25$); transition and the high temperature phase

G. C. de Vries, R. B. Helmholdt, E. Frikkee, K. Kopinga, W. J. M. de Jonge and E. F. Godefroi 803 Synthesis and crystal structure of the ferromagnetic chain system $(C_6D_{11}ND_3)CuBr_3$

R. K. Harris and P. Jackson 813 High-resolution ^1H and ^{13}C NMR of solid 2-aminobenzoic acid

A. Fernández Guillermet 819 On the use of shock-wave data in evaluations of thermodynamic properties

V. Kumar 827 Bond ionicity and susceptibility in $A^IB^{III}C_2^{VI}$ compounds

Nobuo Nakamura and Hideaki Chihara 833 Effect of vacancy diffusion on NQR parameters in LaF_3

D. Srinivas and S. Subramanian 837 Proton positions and the hydrogen bonding scheme in some diamagnetic Tutton's salts—single crystal PMR study

K. Stavrev, K. Kynev, G. St. Nikolov and Vl. A. Dyakovitch 841 Semiempirical assignment of the electron transitions in manganese(II)-doped II–VI compounds

H. T. Chu 845 Quantum size effect in ultra-thin bismuth films

A. A. Berezin 853 Localized states associated with isotopic islands

Kunio Wakamura, Hidetoshi Iwatani and Kenichi Takarabe 857 Vibrational properties of one- and two-mode behaviour in spinel type mixed systems $Zn_{1-x}Cd_xCr_2S_4$

R. Benedek 863 Variational density-functional method for point defects in metals

D. W. Brown and V. M. Kenkre 869 Neutron scattering lineshapes for hydrogen trapped near impurities in metals
